

Data Management

Kingland Systems Corporation (KSC) has over a decade of experience developing data solutions to meet the unique and complex needs of our customers. Fortune 100 companies engage KSC to create, maintain, and manage customer, financial and other data sets, license our data tooling and processing, and produce the highest quality data in the world.

Kingland Systems Corporation offers Solutions for:

- **Legal Entities, Corporate Hierarchies, and Securities:** KSC produces a global master file, which provides the definitive information on global securities and linkage to corporate hierarchies. KSC's global master file contains more than 3.7 million unique active securities from over 160 countries, 5 million unique identifiers such as ISIN, CUSIP, CINS, WKN, and SEDOL, 320,000 unique exchange and trading symbol combinations, and 11 million unique active legal entities from over 220 countries, including corporate hierarchies (subsidiaries, percent ownership, issuers, etc.)
- **Data Cleansing:** Over the years of running some of the world's largest data cleansing projects, KSC has invested in and developed a number of tools, processes and engines that our teams use daily and improve regularly. Clients leverage our experience and expertise, high quality data, proven, reliable, and expandable processes, software, and infrastructure. Recently, KSC completed the world's largest data cleansing and management project for entity and financial securities information in support of global audit firms.
- **Data Management Tools:** Kingland Systems' Data Management Tools empower clients to institute Rapid data management throughout their organization with an intuitive graphical user interface that allows users to manage multiple sources of complex data structures, such as corporate hierarchies.

Current Project Performance:

- Global Master File - enables global firms to ensure compliance with global regulations
- Data Management Tools - empowers clients to institute data management throughout their organization
- Global Securities Linkage – over 6.5 million records published for public securities and linkage to issuers and corporate hierarchies
- Data Cleansing – Aggregation and cleanup of data from nearly 300 sources, augmented with original research
