

Management Consulting

Kingland Systems professionals have over 20 years of experience providing world-class process development and improvement, and technical services consulting. Clients at the top of their industry have called upon us for advice and services related to the challenges they face around the world.

Kingland Systems Corporation offers Solutions for:

- **Business Process Development and Improvement:** KSC employs specialized industry and functional expertise to work with you to identify and understand your unique problems and opportunities, recommending solutions accordingly. KSC leverages expertise and strong execution practices to help you assess your environment, drive improvements, and achieve greater success.
- **Technical Services Consulting:** KSC works with clients to analyze their systems and application usage data, networks, redundancy and infrastructure needs. Through this analysis, KSC provides recommendations for service levels, and technology solutions, including planning, management, and deployment of those solutions, from integrating systems, applications and multiple environments, to creating a business continuity plan and managing real-time replication.
- **Business Expertise:** KSC can provide professionals seasoned in Technology and Business Strategy Alignment, Data Management, Project Management, Application Architecture and Performance, Business Analysis, and Current Industry and Regulatory Issues to work one on one with you and your team.

Recent Project Performance:

- Post-Merger consulting – analysis and work in consolidation of infrastructure and IT systems
- Service Level Assessments and Analysis – verification and recommendations for assuring achievement of required service levels
- Software Development – rescuing critical business projects that have faltered, and customer software development
- Data Center Management – systems and process consulting to ensure business needs are met, including regulatory compliance
